// Day 10 of 10

Day 10

# 10 Career Tips for Developers

Developers make these every day.
Don't be one of them.

→ Swipe through all 10

Mistake #01

# Build in Public

Posting your work gets you noticed

```
// Bad
// Coding alone, showing nobody
// 'I'll share when it's perfect'
// Waiting = invisible

// Good
Post WIP projects on LinkedIn
Share what you learned today
Document your journey
// Consistency > perfection
```

💡 One LinkedIn post/week = massive reach

Mistake #02

# Contribute to Open Source

Best portfolio proof you can have

```
// Bad
// 'I don't know enough yet'
// 'My code isn't good enough'
// Waiting forever

// Good
git clone
// Fix a typo in docs
// Fix a small bug
// Add a missing test
```

💡 Find good-first-issue on GitHub

Mistake #03

# Learn System Design Early

Separates junior from senior

```
// Bad
// Only doing LeetCode
// Never reading architecture
// 'I'll learn it when senior'

// Good
Read: Designing Data-Intensive Apps
Practice: design Twitter, URL shortener
Watch system design channels
// Start NOW, not later
```

💡 System design = promotion material

Mistake #04

# Your GitHub IS Your Resume

HRs look at GitHub before interviews

```
// Bad
// Empty GitHub profile
// No commits for months
// All private repos

// Good
Daily/weekly commits (green squares!)
Good README on every project
At least 3 solid public projects
Pin your best repositories
```

💡 README = your project's LinkedIn headline

Mistake #05

# Network Intentionally

Most jobs are filled through referrals

```
// Bad
// Only applying on job portals
// Cold applying to 100 companies
// No response = give up

// Good
Comment on target company posts
Connect with engineers + send note
Attend meetups online/offline
Ask connections for referrals
```

💡 1 referral > 100 cold applications

Mistake #06

# Write About What You Learn

Teaching solidifies understanding

```
// Bad
// Learning silently
// No notes, no sharing
// Forget in 2 weeks

// Good
Write LinkedIn posts (like this one!)
Start a dev blog on Hashnode
Tweet a tip daily
// Even 200 words counts
```

💡 If you can teach it, you truly know it

**Shubham Bhati**
linkedin.com/in/bhatishubham

Mistake #07

# Master One Stack First

T-shaped skills beat scattered knowledge

```
// Bad
// Learning React + Vue + Angular
// + Spring + Django + Node
// = mediocre at everything

// Good
// Go deep on ONE stack:
Java + Spring Boot → master it
Then add: React, SQL, AWS
// Depth first, breadth later
```

💡 Be excellent at 1, good at 3

**Shubham Bhati**
linkedin.com/in/bhatishubham

Mistake #08

# Prepare for Interviews Daily

Consistency beats cramming

```
// Bad
// Not preparing for months
// Cramming 2 days before interview
// Panics, fails

// Good
// 30 min daily routine:
1 LeetCode easy/medium
1 system design concept
1 Java/Spring topic review
```

💡 30 min/day > 8 hours on Sunday

**Shubham Bhati**
linkedin.com/in/bhatishubham

Mistake #09

# Soft Skills Matter Too

You work WITH people every day

```
// Bad
// 'I'm a developer, I just code'
// Bad communicator
// Can't explain tech to non-tech

// Good
Practice explaining simply
Write clear commit messages
Lead in standups
Document your decisions
```

💡 Developer who communicates well = promoted

**Shubham Bhati**
linkedin.com/in/bhatishubham

Mistake #10

# Be Consistent Not Intense

Marathon, not a sprint

```
// Bad
// 10 hours coding on Saturday
// Nothing for next 2 weeks
// Burnout cycle

// Good
// Sustainable pace wins:
2 hours every weekday
= 40 hours in 4 weeks
// Compound effect is real
```

💡 1% better every day = 37x in a year

**Shubham Bhati**
linkedin.com/in/bhatishubham

```
done = true
```
